## Installation Time Calculator for Fabric Ducts

**KE Fibertec has developed the Installation Time Calculator for Fabric Ducts and made it free to use on their website. This tool will give you the ability to correctly estimate man hours for KE Fibertec's fabric duct systems.**

**The new installation calculator is there to help estimators by eliminating the guess work most mechanical contractors experience when bidding projects using fabric ducts.**

**It requires only a few pieces of information like hanging height and linear feet of the system to generate a time estimate based on a two-man crew using a lift.**

[Installation Time Calculator \(ke-fibertec.com\)](https://ke-fibertec.com)

### Installation Time Calculator

Use the tool below to estimate the time needed to install your KE Fibertec fabric duct system.

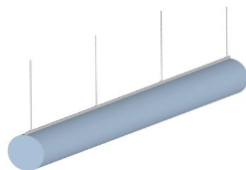

1. Select your install height above the finished floor
2. Choose your suspension type
3. Enter the linear foot (LF) length of your duct in the corresponding box

Calculation based on a two man team with a lift.

Important: Please re-enter the LF each time you change the install height

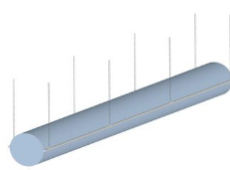

Please select your install height above the finished floor:

#### Single Track Suspension

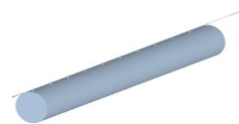

Enter linear feet    
Total man-hours (incl. set-up time): 1.25

#### Double Track Suspension

Enter linear feet   
Total man-hours (incl. set-up time): 0

#### Single Cable Suspension

Enter linear feet   
Total man-hours (incl. set-up time): 0
