

RM MANIFOLD

FS SYSTEMS

US DRAFT

KW DRAFT

Solutions for commercial laundry exhaust systems, high-rise exhaust systems, supply air systems and active compensated stairwell/hoistway pressurization systems.

Pioneering technology of mechanical draft inducers, variable volume flue dampers and related controls for boiler venting industry

Specialized high temp exhaust fans & controls for solid fuel cooking appliances like pizza ovens & coffee roasters

Draft inducers, dampers and controls for commercial and multi-tenant laundry exhaust systems with rapid response to maintain neutral pressure.

The industries first UL 864 listed stairwell pressurization & hoistway controller!!

Prefab shaft system with low profile subduct risers that meets UL 2-hour fire rating

Revolutionary pressure based overdraft draft control technology, in-line fan construction and dampers designed to maintain a constant negative exhaust common manifold or individual boiler exhaust.

Bi-directional pressure transducer for rapid response to varying manifold or individual system pressures on Cat I, II, III & IV heating appliances

Draft fan inducers for high temperature chimney flue and grease duct applications up to 2100 CFM.

UL listed for all gas, liquid, solid fuel burning fireplaces, commercial ovens cooking appliances up to 1000°F continuous (1400°F abnormal)
